Customer Support Standard Operating Procedure

Kaveri Retail Pvt. Ltd. (fictional company used for this project)

SOP-CS-05, version 5.1, effective 1 July 2026

1. Ticket Priorities and SLAs

High priority tickets must receive a first response within 2 hours and be resolved within 24 hours. Medium priority: first response within 8 hours, resolution within 3 business days. Low priority: first response within 24 hours, resolution within 5 business days. SLA time counts only business hours, 9 am to 9 pm, Monday to Saturday.

2. Automatic Tagging

Every new ticket is tagged with a category and sentiment by the AI ticket classifier. Tickets where the model confidence is low are marked needs_review and must be checked by a Level 1 agent before routing. Agents should correct wrong tags because corrected tags are used to retrain the model every quarter.

3. Escalation Matrix

Level 1 agents handle all tickets first. Escalate to a Level 2 specialist if the ticket is not resolved within the SLA, if the customer has raised three or more tickets in 30 days, or if the sentiment is negative and the customer is in the High churn-risk band. Escalate to the Support Manager if a refund above Rs 10,000 is requested or if the customer mentions legal action or social media.

4. Churn-Risk Call Protocol

Every morning the urgent call list (high churn-risk customers with a negative ticket in the last 60 days) is shared with the retention team. Each customer must be called within 1 business day. The agent may offer up to a 10 percent discount or 2 months of Premium plan free. Offers above that need Support Manager approval.

5. Refund Approval Limits

Level 1 agents can approve refunds up to Rs 2,000. Level 2 specialists can approve up to Rs 10,000. Refunds above Rs 10,000 need Support Manager approval, and above Rs 50,000 need Finance Head approval.

6. Tone and Language

Reply in the language the customer used, including Hinglish. Apologise once, explain the next step and give a specific time. Never promise a timeline shorter than the policy timeline.
