Returns and Refund Policy

Kaveri Retail Pvt. Ltd. (fictional company used for this project)

RET-01, version 3.2, effective 1 April 2026

1. Purpose

This policy explains when customers can return products, how refunds are paid, and how long each step takes. It applies to all orders placed on the Kaveri Retail website and app.

2. Return Window by Category

Electronics can be returned within 7 days of delivery. Clothing can be returned within 15 days of delivery. Furniture can be returned within 10 days of delivery, only if it is unassembled and in original packaging. Office Supplies can be returned within 30 days of delivery. Items marked 'Final Sale' cannot be returned. The return window is counted from the delivery date shown in the tracking history.

3. Condition of Returned Items

Products must be unused, with all tags, accessories, manuals and the original box. Electronics must be factory reset and must not have physical damage. If an item fails the quality check at the warehouse, it is sent back to the customer and no refund is issued.

4. Refund Timelines

After the returned item passes the quality check, the refund is started within 48 hours. Refunds to the Kaveri Wallet are credited within 24 hours of approval. Refunds to UPI are credited within 2 to 3 business days. Refunds to credit or debit cards take 5 to 7 business days, depending on the bank. Cash on Delivery orders are refunded to the Kaveri Wallet or to a bank account given by the customer.

5. Partial Refunds

If only part of an order is returned, only the returned items are refunded. Shipping charges are not refunded unless the item was damaged, defective or wrong. Coupon discounts are adjusted proportionally across items.

6. Cancellations

Orders can be cancelled free of charge before they are shipped. After shipping, the customer must refuse the delivery or raise a return. Cancelled prepaid orders are refunded using the same timelines as section 4.

7. Refund Delays and Escalation

If a refund is not received within 10 business days after approval, the customer should raise a ticket with category Refund. Support must treat such tickets as High priority. A refund delayed beyond 15 business days must be escalated to the Finance Operations team, and the customer receives a goodwill credit of Rs 200 in the wallet.
